INID CODES FOR IDENTIFICATION OF BIBLIOGRAPHIC DATA

INVENTIONS, UTILITY MODELS

- (10) Number of publication for application, which has been examined
- (11) Number of patent and kind of document
- (21) Serial number of application
- (22) Date of filing of the application
- (23) Date of exhibition or the date of the earlier filing and the number of application, if any
- (24) Date from which patent may have effect
- (31) Number of priority application
- (32) Date of filing of priority application
- (33) Code of the country or regional organization allotting priority application number
- (44) Date of publication of application not granted, but examined and number of bulletin
- (45) Date of publication of registered document
- (51) International Patent Classification Index
- (54) Title of the invention
- (57) Abstract
- (60) Number of examined patent document granted by foreign patent office, date from which patent has effect and country code
- (62) Number of the earlier application and in case of divided application, date of filing an application
- (71) Name, surname and address of applicant (country code)
- (72) Name, surname of inventor (country code)
- (73) Name, surname and address of patent owner (country code)
- (74) Name, surname of representative or patent attorney
- (85) Date of commencement of the national phase of International Application
- (86) Number and date of filing of international application
- (87) Number and date of publication of international application

DESIGNS

- (10) Number of publication for application
- (11) Number of patent and kind of document or number of registration
- (15) Date of registration/Date of patent renewal
- (18) Expected expiration date of patent or registration
- (21) Serial number of application
- (22) Date of filing of the application
- (23) Date of exhibition or the date of the earlier filing and the number of application, if any
- (24) Date from which patent may have effect
- (28) Number of designs included in the application
- (30) Data relating to priority (number of application, date of filing of application, two-letter code identifying the authority with whom the priority application was made)
- (31) Number of priority application
- (32) Date of filing of priority application
- (33) Code of the country or regional organization allotting priority application number
- (34) Two-letter code according to WIPO St.3 identifying the authority with which the priority application was made
- (44) Date of publication of design and number of bulletin (the first publication)
- (45) Date of publication of design registered by WIPO and number of bulletin
- (51) International Classification for designs (class and subclass of the Locarno Classification)
- (54) Title of the invention
- (55) Reproduction of the design
- (57) Description of characteristic features of the design including indication of colors
- (58) Date of recording of any kind of amendment in the Register
- (62) Number of the earlier application, registration and document number and if available the date of filing an application in case of divided application
- (71) Name, surname and address of applicant (country code)
- (72) Name, surname of creator (country code)
- (73) Name, surname and address of patent owner (country code)
- (74) Name, surname of representative or patent attorney
- (81) Contracting states concerned
 - II designated contracting states according to the 1960 Act
 - III designated contracting states according to the 1999 Act
- (85) Owner's permanent address
- (86) Owner's nationality
- (87) Owner's residence
- (88) State in which the owner has a real and effective industrial or commercial establishment

TRADEMARKS

- (111) - Number of registration
- (151) - Date of registration
- (156) - Date of the renewal
- (181) - Expected expiration date of registration
- (186) - Renewal expiration date of registration
- (141) - Date of cancel of duration of the mark
- (210) - Serial number of application
- (220) - Date of filing of the application
- (230) - Date concerning exhibition
- (260) - Number of application, for which favorable decision of examination about registration has been taken (publication number)
- (310) - Number of the first application
- (320) - Date of filing of the first application
- (330) - Code, identifying national or regional Office where the first application was made
- (511) - International Classification of Goods and Services for the purposes of registration of trade marks and/or list of goods and/or services classified according thereto
- (531) - Description of figurative elements of Trade Marks according to the International Classification of the Figurative Elements of Marks
- (540) - Reproduction of Trade Mark
- (550) - Nature and kind of Trade Mark
- (580) - Date of recording of any kind changes in respect of applications or registrations
- (591) - Information concerning colors claimed
- (731) - Name and address of the applicant
- (732) - Name and address of the holder of the registration
- (740) - Name and address of the representative
- (750) - Address for correspondence
- (770) - Name and address of the previous applicant or holder in case of change in ownership
- (771) - Previous name and address of the applicant or holder in case of change in ownership
- (791) - Name and address of the licensee
- (793) - Indication of conditions and/or restrictions under the license (Type of license, number of license agreement, data of license, data of validity of license)
- (800) - Certain data relating to the international registration of Trade Marks under the Protocol Relating to Madrid Agreement (International registration number)

CODES FOR PUBLICATION IN BULLETIN

(54) METHOD OF BIONANOCERAMICAL
SUPERPARAMAGNETICS
PREPARATION

(57) There is represented preparation method of bionanoceramical superparamagnetics in a device of zeta potential, wherein iron chloride 5% water solution is used as electrolit, and toluol with 0.6-0.7% olein acid additive is placed above thereof. The method provides 0.5 A/dm² density current passing throughout electrolyte, iron ions extraction from anode, covering therewith rotating cathode surface, wherein ions restoration takes place till forming electroneutral particles, iron particles bringing in toluol layer as a result of cathode rotation, and removal thereby toluol, after which fogging the electrolyte process is finished, toluol layer is separated, dried, and the rest is baked in the muffle furnace up to Curie's (769°C) temperature (770-800°C), then, it is oxidized, and alpha iron oxygen of paramagnetic condition is received.

(54) PLANAR MAGNETRON SPRAY DEVICE

(57) A device comprises an evacuated chamber, wherein are placed: an anode, a cathode assembly comprising a cathode having disk-shaped target and a magnetic system, a footboard catcher and cooling liquid system for cathode assembly. In the cathode assembly the magnetic system is fixed on disk-shaped catcher produced with magnetic soft material and performed rotatable under force of cooling liquid stream. On the catcher the magnetic system comprises the constance magnet groups. Each group similar poles are located accordingly a loop made by circle simetrical evolvents of particular radius. The magnet groups are performing closed loop. Additionaly, the device comprises a hollow cylindrical electrode located between anode and footboard catcher.
