INID CODES FOR IDENTIFICATION OF BIBLIOGRAPHIC DATA

INVENTIONS, UTILITY MODELS

- (10) Number of publication for application, which has been examined
- (11) Number of patent and kind of document
- (21) Serial number of application
- (22) Date of filing of the application
- (23) Date of exhibition or the date of the earlier filing and the number of application, if any
- (24) Date from which patent may have effect
- (31) Number of priority application
- (32) Date of filing of priority application
- (33) Code of the country or regional organization allotting priority application number
- (44) Date of publication of application not granted, but examined and number of bulletin
- (45) Date of publication of registered document
- (51) International Patent Classification Index
- (54) Title of the invention
- (57) Abstract
- (60) Number of examined patent document granted by foreign patent office, date from which patent has effect and country code
- (62) Number of the earlier application and in case of divided application, date of filing an application
- (71) Name, surname and address of applicant (country code)
- (72) Name, surname of inventor (country code)
- (73) Name, surname and address of patent owner (country code)
- (74) Name, surname of representative or patent attorney
- (85) Date of commencement of the national phase of International Application
- (86) Number and date of filing of international application
- (87) Number and date of publication of international application

DESIGNS

- (10) Number of publication for application
- (11) Number of patent and kind of document or number of registration
- (15) Date of registration/Date of patent renewal
- (18) Expected expiration date of patent or registration
- (21) Serial number of application
- (22) Date of filing of the application
- (23) Date of exhibition or the date of the earlier filing and the number of application, if any
- (24) Date from which patent may have effect
- (28) Number of designs included in the application
- (30) Data relating to priority (number of application, date of filing of application, two-letter code identifying the authority with whom the priority application was made)
- (31) Number of priority application
- (32) Date of filing of priority application
- (33) Code of the country or regional organization allotting priority application number
- (34) Two-letter code according to WIPO St.3 identifying the authority with which the priority application was made
- (44) Date of publication of design and number of bulletin (the first publication)
- (45) Date of publication of design registered by WIPO and number of bulletin
- (51) International Classification for designs (class and subclass of the Locarno Classification)
- (54) Title of the invention
- (55) Reproduction of the design
- (57) Description of characteristic features of the design including indication of colors
- (58) Date of recording of any kind of amendment in the Register
- (62) Number of the earlier application, registration and document number and if available the date of filing an application in case of divided application
- (71) Name, surname and address of applicant (country code)
- (72) Name, surname of creator (country code)
- (73) Name, surname and address of patent owner (country code)
- (74) Name, surname of representative or patent attorney
- (81) Contracting states concerned
 - II designated contracting states according to the 1960 Act
 - III designated contracting states according to the 1999 Act
- (85) Owner's permanent address
- (86) Owner's nationality
- (87) Owner's residence
- (88) State in which the owner has a real and effective industrial or commercial establishment

(54) **TRICKLE**

(57) A trickle comprises a case 1 with trickling hole 4, and fastening element 2 connecting the case to an irrigation pipe 3. The case has a cylindrical form and cut conic end, with which it is located into the irrigation pipe floodgate hole, and a shut-off-and-regulating element – a bolt 5 is screwed into the case trickling hole. Fastening element and the case are made as a united detail executed as a yoke having a latch 6.

(57) There is represented a method comprising following steps: (a) inserting preferably compacted

materials in a reaction chamber and closing the chamber; (b) injecting combustible gas flow and corresponding comburent gas flow, which are in the correct stoichiometric ratio to each other, into the reaction chamber so, as to activate materials combustion; (c) continuing thermochemical reaction of oxidizable elements, for example carbon, with oxygen present, without introducing any more gases; (d) injecting comburent gas to feed thermochemical reactions of oxidizable elements present in the materials, until temperature increasing stops; (e) opening throttle valve 5 to expel gases, while continuing to introduce comburent gas at substantially constant pressure until all remaining carbon has been oxidized, strongly bound oxides have been subjected to pyrolysis and present metals have been oxidized.

and supplying diagnostics for telemetry and information in a remote communication network system, particularly principal display terminals; electrical apparatus used as components of a private line test system for carrying out tests on systems for condition monitoring for controlling circuits and supplying diagnostics for telemetry and information in a remote communication network system, principal display terminals sold as a unit; electrical apparatus used as components of a private line test system for carrying out tests on audio distribution amplifiers; electrical apparatus used as components of a private line test system for carrying out tests on loudspeaker monitors; electrical apparatus used as components of a private line test system for carrying out tests on series loop access systems, for providing access to series loop circuits comprising access panels to series loops and control panels relating thereto, sold as a unit; switching panels (patching); components of apparatus for communication and communication devices, particularly terminal blocks, conference bridges, jack panels, jacks, transfer switches, coupling leads, plugs, reels for telephones, repeating reels, connector cables, solid state telegraphic relays; battery chargers, particularly battery chargers for aircraft and battery chargers for industrial and leisure vehicles; ammeters for direct current, transformers; private line test equipment for carrying out tests on communication systems comprising access modules, line selection modules, signal and/or composition modules, test modules and ohmmeters, sold as a unit, current sensors, magnetic amplifiers, diffusion filters, speed monitors for motors for monitoring the speed of electric motors, power units for providing a power supply to electrical apparatus, particularly computers; mechatronic systems, namely synergistic and systematic combinations of mechanics, electronics and computing in real-time, relays, automobile telecommunication devices, computing and industrial relays, electronic apparatus, electrical apparatus, namely electrical apparatus used in relation with the aerospace industry and the defence industry (except armaments), with computing, electronics, electrical tools, gardening tools, multiswitches, fixed stations, network interface cards, cards for computers, systems for the distribution of electrical power including rail transportation systems, network wiring for buildings, automobiles, transportation namely with all kinds of water, air and land vehicles particularly aircraft, cars, trucks, boats, motor cycles, bicycles, telecommunications networks, industrial engines, lighting, machine tools and production monitoring equipment, heating, ventilation and air-conditioning, components for security systems, instrumentation and medical equipment as well as in relation with devices for assisting mobility and medical diagnostic devices and railway devices; terminals; splices, support sockets for chips; linear, digital,

analogical, electronic, electrical circuits; bridge circuits; integrated circuits; electrical adapters, hybrid adapters; sensors, magnetic sensors, radar sensors, inductive sensors; gas sensors; wireless components and subsystems; antennas; aerial systems; audio- and video-receivers; GPS receivers; circuit boards; electrical distribution boxes; multi-circuit electrical bands; touch screens; tactile computers, interactive screens; monitors for computers; computer monitor bezels, computer network des, switches and routers; apparatus for computer networking; apparatus for linking computers in networks, apparatus for protecting computers against electrical power supply problems; items intended for single use in computer wiring ducts, items intended for single use in supporting computer cables, emergency controls for computers; broadband data interconnection computer installations; electronic components for computers; fiber optic computer installations for use with computers; components of connections ("plug-in") for computer modems; electrical processing equipment, namely connectors between wires and boards, boards and boards, cables and boards and cables and cables; inductors, high current indicators, cable wind indicators, chokes, high current indicators, drum core indicators, shielded cable reel inductors, n shielded reel inductors, electric inductors; LAN protocol magnetic elements; magnetic modules; resistors; resistances, electric; commutators; switches, electric; chip cards; fiber optic products; electro-optical products; circuit board assemblies for multiple connectors; circuit board assembly interconnections for multiple connectors; attenuators; multiplexers; amplifiers; data communication systems; heat-shrink sheaths; filters, electrical line filters; signal filters, duplexers; capacitors; transformers; couplers; batteries; battery terminals; microwave products, circuit mixers, frequency modulators; converters; heat sinks; heat sinks intended for electronic apparatus; measuring devices; controllers; radio frequency identification tags for radio frequency identification (RFID), protective devices against short circuits; switches, electric; fuses; radar systems; components of radio frequencies (RF); cabinets for loudspeakers, switch-boxes (electricity), distribution boxes (electricity), cabinets intended for computers; thermoretractable sheaths and their enclosures; electrical and electronic components for identification and labelling; electronic and electrical panels; fiber optic panels; radios; accessories for radios; converters, electric; keyboards; screens; touchscreen systems, namely touchscreens, touchscreen monitors, computer keyboards, touchscreen computers, electronic components for touchscreen technology, particularly micro controllers and electronic accessories, particularly magnetic tapes or credit card readers, small display devices for frontal display, for use with touchscreens and touchscreen computers; electrical sleeves,

electrical connectors, electrical spacers, voltage surge protectors, electrical equipment for applying voltage and grounding; link boxes; electrical control cabinets; vibration indicators; electrical fuses, light-emitting diodes [LED]; telecommunication equipment, particularly terminal blocks for cables for moving and insulating; electrical protection devices (except for insulators) and against voltage surge for electrical and electronic telecommunication systems and data telecommunication systems; connectors, namely voltage surge protectors, fuses, diodes for fuses, thermo-protective switches and varistors; cable systems for telecommunication; dividers; optical dividers; multi-user wall housings; residential wall and floor cabinets for cabled or optical links; computer equipment such as gateways, switches, bridges, routers, concentrators, repeaters and network adapters, equipment and components for use in transmission or data, text, video, audio and voice transfer by broadband, radio broadcasting, cable broadcasting, coaxial cable, copper wires, fiber optics, radio, telephone, twisted pairs, wire, wireless and other telecommunication technology; computer software for use in the use and management of telecommunications systems, in equipment and in communications on such systems; electrical metal connectors and connectors, accessories for wiring for electrical distribution networks, electrical terminals and junctions, electrical locking devices; lighting controllers; systems for cables for vehicles, wiring harnesses for vehicles; controls for LEDs; systems for electrical cable harnesses and connectors; accessories for the distribution of electricity conduits; devices for managing cables, electrical lines; acoustic products, namely surface waves, sonic and ultrasonic waves traveling on the surface of a screen, systems for recognizing audio impulses, audio microphones; interfaces such as parts of the abovementioned goods; acoustic pick-ups, particularly audio microphones, micro controllers for tactile recognition of acoustic waves, software for tactile recognition of acoustic waves.

17 – Rubber, gutta-percha, gum, vinyl and products made of semi-processed plastics; packing, stopping and insulating materials; flexible tubes, t of metal; tubing, namely tubing and connection pieces t of metal for pipes, tubing of rubber, heat shrink tubes, tubing for nuclear applications, sheaths for tubing; rubber products; electrical insulating products and electrical insulating materials; tubes; insulating goods and materials; casings for cables of plastic; insulating tape, tapes for cable links, tapes for securing cables, adhesive tapes; insulating sealants, insulating tape and insulating sealing products, tapes for tying cables and for fitting cables; films made of polyester; thermoretractable sheaths; shrinkable sheaths; adhesives other than for medical,

stationery or household purposes; thermal devices as parts of the abovementioned goods, namely thermal conduits.

37 – Construction; repair, installation services; installation and repair of telecommunication networks; installation, maintenance and repair of telecommunication apparatus; installation, maintenance and repair of telecommunication installations, communications networks, computer networks and data networks; wiring buildings for transmitting telecommunication, wiring for telecommunication; construction; installation, maintenance and repair; installation, maintenance and repair of electrical systems and equipment; machinery installation, maintenance and repair; services involving maintenance and repair of technical products; installation and repair of telecommunication systems and facilities (computer hardware), computer hardware and computer peripheral devices; installation and repair of equipment and household infrastructure systems (computer hardware); consulting in installation and performance of data cable systems; consulting in installation of telecommunication systems and networks; all above-mentioned services particularly relating to products under guarantee.

38 – Telecommunications; services involving terrestrial, wireless and underwater communication; consulting in the field of telecommunication.

7 – Machines and machine tools; electronic components for machines, tools, automobile parts; machines for producing and for assembling printed circuit cards; labelling machines; finishing machines, setting machines and machines for creating bundles; thermal devices such as parts of the abovementioned goods, namely ventilators, compressor impellers, heat sinks.

8 – Hand tools and implements, hand-operated; tools and hand tools and related accessories; parts and components for hand tools.

9 – Scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking [supervision], life-saving and teaching apparatus and instruments; apparatus and

instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity; apparatus for recording, transmission or reproduction of sound or images; magnetic data carriers, recording discs; automatic vending machines and mechanisms for coin-operated apparatus; cash registers, calculating machines; data processing equipment and computer hardware and peripheral equipment for computers; computer software; computer wiring systems; electromechanical systems and parts and components related thereto; connectors and connection systems; electrical connectors, components of connectors, particularly containers; connectors for equipment ("plug-in" connections); couplings, connections and joints; connector housings; components of wiring systems, particularly punchdown blocks (bars for multiple connections); jacks, plugs, connecting cords, connecting panels; wires and cables, cables of fiber optics; underwater cables, telecommunications cables, fiber optic and electric harnesses, electrically conductive cable terminations; collars for wiring of metal; housings for ground connections and guard shields for high voltage cables; accessories for high voltage cables for industry in aerial and underground installations, including external oil bath terminals, dry external terminals; electric cables for lighting installations; ducting for electrical wiring, cassettes for managing fiber optic cables (plug and play cassettes), components of cabling for improving transmission of signals, particularly plates, divider coils, blocks, brackets, wiring gutters, rings and clips, housing for outlets and panels, and overvoltage protector devices; communication equipment, particularly electric jacks, plugs, blocks, terminal strips, connection panels, connectors for couplings and cords, signal repeaters, signal conditioners, communication distribution frames, fiber optic couplers, fiber optic wavelength-division multiplexers/demultiplexers, connection modules, interface modules, test modules, disconnection modules, connection and switching chassis, patchings; devices for switching and monitoring electric power supplies; control modules for connection and switching, data line emulators and monitors, transmission test kits, test cards for network switches (PBX), controllers for switching and controllers for networks, switching cards, switching cables, digital signal cross-circuit modules, transmission circuit boards, signalling subboards, transmission setting plates and connection designation bands; test equipment for private lines for carrying out tests on communication systems comprising test modules, service modules, signal test modules, cable reels, electrical panels and cable cages, particularly with the option of oscillation, amplification, attenuation, and comprising kits, terminals, repeating reels, terminal signal converters, signal relays, cords with plugs, monitor loudspeakers, control devices for transmission buffers,

automatic level control devices, bridge transformers, pulse generators, external impellers, loopbacks and control devices for test baseplates, sold as a modular unit; electrical apparatus used as components of a private line test system for carrying out tests on communication systems, particularly test modules, service modules, signal test modules, cable reels, electrical panels and cable cages, particularly with the option of oscillation, amplification, attenuation, and comprising kits, terminals, repeating reels, terminal signal converters, signal relays, cords with plugs, loudspeakers, control devices for transmission buffers, automatic level control devices, bridge transformers, external impellers, loopbacks and control devices for test baseplates; electrical apparatus used as components of a private line test system for carrying out tests on loopbacks, for controlling and testing two-wire communication lines, comprising a sender and a receiver, sold as a unit; electrical apparatus used as components of a private line test system for carrying out tests on sender and receivers, used in loopback test systems, for controlling and testing two-wire communication lines; electrical apparatus used as components of a private line test system for carrying out tests on fuse panels; electrical apparatus used as components of a private line test system for carrying out tests on systems for status monitoring, for controlling circuits and supplying information and diagnostics telemetry in a remote communication network system, particularly principal display terminals sold as a unit; electrical apparatus used as components of a private line test system for carrying out tests on systems for condition monitoring for controlling circuits and supplying information and diagnostics telemetry in a remote communication network system, particularly principal display terminals; electrical apparatus used as components of a private line test system for carrying out tests on audio distribution amplifiers; electrical apparatus used as components of a private line test system for carrying out tests on loudspeaker monitors; electrical apparatus used as components of a private line test system for carrying out tests on serial loop access systems, for providing access to serial loop circuits comprising access panels to serial loops and control panels relating thereto, sold as a unit; switching panels (patching); components of apparatus for communication and communication devices, particularly terminal blocks, conference bridges, jack panels, jacks, transfer switches, coupling leads, plugs, reels for telephones, repeating reels, connector cables, solid state telegraphic relays; battery chargers, particularly battery chargers for aircraft and battery chargers for industrial and leisure vehicles; ammeters for direct current, transformers; private line test equipment for carrying out tests on communication systems comprising access modules, line selection modules, signal and/or composi-

tion modules, test modules and ohmmeters, sold as a unit, current sensors, magnetic amplifiers, diffusion filters, speed controllers for motors for controlling the speed of electric motors, power units for providing a power supply to electric apparatus, particularly computers; mechatronic systems, namely synergistic and systematic combinations of mechanics, electronics and computing in real-time, relays, automobile telecommunication devices, computing and industrial relays, electronic apparatus, electric apparatus, namely electric apparatus used in relation with the aerospace industry and the defence industry (except arms), with computing, electronics, electric tools, gardening tools, switches, fixed stations, network interface cards, cards for computers, systems for the distribution of electric power including rail transportation systems, network wiring for buildings, automobiles, transportation namely all kinds of water, air and land vehicles particularly aircraft, cars, trucks, boats, motor cycles, bicycles, telecommunications networks, Industrial engines, lighting, machine tools and production control equipment, heating, ventilation and air-conditioning, components for security systems, instrumentation and medical equipment as well as in relation with devices for assisting mobility and medical diagnostic devices and railway devices; terminals; splices, support sockets for chips; linear, digital, analogue, electronic, electric circuits; bridge circuits; integrated circuits; electric adapters, hybrid adapters; sensors, magnetic sensors, radar sensors, inductive sensors; gas sensors; wireless components and subsystems; antennas; aerial systems; audio- and video-receivers; GPS receivers; circuit boards; electric distribution boxes; multi-circuit electric bands; touch screens; tactile computers, interactive screens; monitors for computers; computer monitor bezels, computer network des, switches and routers; apparatus for computer networking; apparatus for linking computers in networks, apparatus for protecting computers against electric power supply problems; items intended for single use in computer wiring ducts, items intended for a single use in supporting computer cables, emergency controls for computers; broadband data interconnection computer installations; electronic components for computers; fiber optic computer installations for use with computers; components of ("plug-in") connections for computer modems; electric processing equipment, namely connectors between wires and boards, boards and boards, cables and boards and cables and cables; inductors, high current inductors, cable wind indicators, electronic chokes, high current indicators, drum core indicators, shielded cable reel inductors, n shielded reel inductors, electric inductors; magnetic LAN protocol elements; magnetic modules; resistors; resistances, electric; commutators; switches, electric; chip cards; fiber optic products; electro-optical products; circuit board as-

semblies for multiple connectors; circuit board assembly interconnections for multiple connectors; attenuators; multiplexers; amplifiers; data communication systems; heat-shrink sheathes; filters, electric line filters; signal filters, duplexers; capacitors; transformers; couplers; batteries; battery terminals; microwave products, circuit mixers, frequency modulators; converters; heat sinks; heat sinks intended for electronic apparatus; measuring devices; controllers; radio frequency identification tags for radio frequency identification (RFID), protective devices against short circuits; switches, electric; fuses; radar systems; components of radio frequencies (RF); cabinets for loudspeakers, switchboxes (electricity), distribution boxes (electricity), cabinets intended for computers; thermoretractable sheaths and their enclosures; electrical and electronic components for identification and labelling; electronic and electric panels; fiber optic panels; radios; accessories for radios; converters, electric; keyboards; screens; touch responsive systems, namely touchscreens, touchscreen monitors, computer keyboards, touch responsive computers, electronic components for touch responsive technology, particularly micro controllers and electronic accessories, particularly magnetic bands or credit card readers, small display devices for frontal display, for use with touchscreens and touch responsive computers; electric sleeves, electric connectors, electric spacers, voltage surge protectors, electric equipment for applying voltage and grounding; link boxes; electric control cabinets; vibration indicators; electrical fuses, light-emitting diodes [LED]; telecommunication equipment, particularly connection blocks for cables for moving and insulating; electric protection devices (except for insulators) and against voltage surge for electric and electronic telecommunications systems and data telecommunication systems; connectors, namely voltage surge protectors, fuses, diodes for fuses, thermoprotective switches and varistors; cable systems for telecommunication; dividers; optical dividers; multi-user wall housings; residential wall and floor cabinets for cabled or optical links; computer equipment such as gateways, switches, bridges, routers, concentrators, repeaters and network adapters, equipment and components for use in data, text, video, audio and voice transfer or transmission by broadband, radio broadcasting, cable broadcasting, coaxial cable, copper wires, fiber optics, radio, telephone, twisted pairs, wire, wireless and other telecommunication technology; computer software for use in operation and management of telecommunications systems, in equipment and in communications on such systems; electric metal connectors and couplings, accessories for wiring for electric distribution networks, electric terminals and junctions, electric locking devices; lighting controllers; systems for cables for vehicles, wiring harnesses for vehicles; controls with LEDs; systems for electric

cable harnesses and connectors; accessories for the distribution of electricity conduits; devices for managing cables, electric lines; acoustic products, namely surface waves, sonic and ultrasonic waves traveling on the surface of a screen, systems for recognizing audio impulses, audio microphones; interfaces such as parts of the abovementioned goods; acoustic pick-ups, particularly audio microphones, micro controllers for tactile recognition of acoustic waves, software for tactile recognition of acoustic waves.

17 – Rubber, gutta-percha, gum, vinyl and products made of semi-processed plastics; packing, stopping and insulating materials; flexible tubes, of metal; tubing, namely tubing and connection pieces of metal for pipes, tubing of rubber, heat-shrink tubes, tubing for nuclear applications, sheaths for tubing; rubber products; electric insulating products and electric insulating materials; tubes; insulating goods and materials; casings for cables of plastic; insulating tape, tapes for cable links, tapes for securing cables, adhesive tapes; insulating sealants, insulating tape and insulating sealing products, tapes for tying cables and for fitting cables; films made of polyester; thermoretractable sheaths; shrinkable sheaths; adhesives other than for medical, stationery or household purposes; thermal devices as parts of the abovementioned goods, namely thermal ducting.

37 – Construction; repair, installation services; installation and repair of telecommunication networks; installation, maintenance and repair of telecommunication apparatus; installation, maintenance and repair of telecommunication installations, communications networks, computer networks and data networks; wiring buildings for transmitting telecommunication, wiring for telecommunication; construction; installation, maintenance and repair; installation, maintenance and repair of electric systems and equipment; machinery installation, maintenance and repair; services involving maintenance and repair of technical products; installation and repair of telecommunications systems and equipment (computer hardware), computer hardware and computer peripherals; installation and repair of household infrastructure and equipment systems (computer hardware); consultancy on installing and performance of data cable systems; consultancy on installing telecommunication systems and networks; all above-mentioned services particularly relating to products under guarantee.

38 – Telecommunications; services involving terrestrial, wireless and underwater communications; consultancy on telecommunication.

6 – Vats of metal; containers of metal; liquid containers, in particular for beverages; liquid storage tanks; mash tuns for the production of beer; lauter tuns for the production of beer (t included in other classes); fermentation tanks; pressure vessels and pressure tanks of metal; pipes of metal; valves of metal, except in the form of machine parts; container caps of metal; accessories for cellar systems for the production of malted beverages (t included in other classes); high-bay warehouse systems of metal. 7 – Machines for the beverage, food, pharmaceutical, cosmetic, chemical and plastic processing Industries; machines for malthouses, breweries and dairies; machines for the production, coating, transportation, treatment, inspection, packaging and recycling of bottles, cans, glasses, packages, cartons, bottle crates and piece goods; machines for palletizing, depalletizing, packing, unpacking, sorting, cleaning, inspection, filling, sealing, labeling and packaging; machines for removing bottles from beverage crates; machines for grouping, distributing and bringing together packs; bottle inspection machines; carbonization and mixing apparatus, in particular for the production of syrups and beverages; beverage degassing machines; installations (machines) for processing and dosing gases, flavouring agents, sugar, pieces of fruit, malt, hops, as far as required for making and bottling beverages and liquid foodstuff; machines for carbonating beverages; machines for impregnating liquids and in particular beverages; mixers for making beverages; machines for producing liquid mixtures with predetermined mixing ratios for malthouse, brewery, dairy and winepress machines; devices for mixing liquids; injection molding, injection blow molding, extrusion molding, stretch blow molding and blowing machines for the production of hollow bodies of plastic, in particular bottles and containers of plastic; injection molds and blow molds (machine parts); machines and mechanical equipment for producing, coating, storing, transporting, inspecting, sorting, heating, cooling and shaping of blanks for plastic bottles; electric cleaning machines; bottle capper machines; screw cappers for containers (machines for applying closing caps); machines composed of a plurality of system parts, or

machine parts for closing containers; components of warehouse systems and warehouse management systems for the beverage, food, pharmaceutical, cosmetic, chemical and plastic processing Industries, namely pneumatic or hydraulic drives, belt conveyors, pneumatic conveyors, pressure controllers, pressure valves, machine housings, motors and valves; filtering installations (machines) for making beverages, in particular for beer and wine filtration; filters as parts of machines for making beverages, in particular for beer and wine filtration; beer stabilizing filters, wort filters and ceramic filters (machine parts); pumps (machines), in particular dosing pumps, beer pumps; copper tubes for beer wort coppers; valves (machine parts), in particular disk valves, seated valves, double-seated valves, control valves, pressure valves; strainers (machines or machine parts), in particular angle type strainers; fittings (machine parts); water separators; machine shafts; controllers (machine parts); pressure cylinders; malt mills (machines); grain mills; machines for cleaning grain; stirring devices, electric; stirring machines; centrifuges (machines); settling filters for beer filtration as machine parts; stocking machines, in particular for labels; lifting equipment and conveyor belts; cutting machines; installations for dissolving substances in liquids; hydro-electric power stations and their components (t included in other classes); hydraulic turbines; current generators; waste disposal apparatus and machines; mechanical power generation and heat generation plants, in particular solar power plants, wind power plants, biomass heating power plants; mechanical installations for combined heat and power generation.

9 – Electric and electronic apparatus for measuring, testing, monitoring and regulating; electric display devices; computer programs for warehouse management systems and transport control units, in particular for the beverage, food, pharmaceutical, cosmetic, chemical and plastic processing Industries; computer and computer programs for controlling machines for the beverage, food, pharmaceutical, cosmetic, chemical and plastic processing industries; computers, software, memories, printers, monitors and control systems consisting thereof for controlling and regulating brewing installations, filling installations, packaging installations and sorting installations, and individual machines of these installations; electromechanical and electronic sensors for said installations; intralogistic systems; machines and devices for inspecting bottles, cans, glasses, packages, cartons, bottle crates and piece goods (inspection machines); machines and devices for inspecting blanks for plastic bottles; machines for detecting foreign matter (inspection machines), in particular in filled bottles; analysis instruments, t for medical purposes; apparatus and installations for generating X-

ray, gamma rays, ultraviolet and electron rays, t for medical purposes; gas analysis equipment; photo elements; frequency meters; filters for photographic purposes; CCD chips; telemeters; magnetic data carriers; detectors; temperature measurement devices; optical lamps; apparatus and installations for generating electric power.

11 – Cookers; cooking apparatus and installations; installations for cooking wort for beverages; burners; filtering installations for making beverages, in particular for beer and wine filtration; filters (as parts of domestic or industrial installations); liquid filters (parts of domestic or industrial installations); beer stabilizing filters, wort filters, ceramic filters; sterilizing and pasteurizing machines; disinfectant apparatus; distillation apparatus; water treatment devices; water treatment installations; water purification installations; water distribution installations; water softening installations; water filters; water filtering apparatus; installations for drying containers, in particular for drying outer surfaces of filled containers; installations for blow drying, in particular for blow drying containers; machines for cooling and heating blanks for plastic bottles (heating and cooling units); installations for the heat treatment of beverages; installations for heating liquids, in particular liquids filled in containers; installations for degassing liquids, in particular water and beer wort; installations for aerating liquids, in particular water; apparatus for heating liquids to ultra-high temperatures; sprinkler installations, in particular for sprinkling containers; wastewater treatment plants; heating boilers; heating installations; heat pumps; heat exchangers; steam generating installations; coolers; cooling installations for liquids; homogenizers; clean rooms; sterile rooms; steam accumulators; heat accumulators; thermal energy accumulators; installations for heating plastic foils; installations for treating process water; carbonating installations (as part of industrial installations); ferments; yeast breeding installations, in particular for beverages; apparatus and installations for generating thermal energy; recuperators; installations for combined heat and power generation (heating).

37 – Installation, putting into operation, maintenance and repair of the machines, apparatus and devices mentioned in classes 7, 9 and 11 and the installations consisting thereof; maintenance and repair of computer hardware, installation and repair of electric appliances, the aforementioned services for installations suitable for use in the beverage, food, pharmaceutical, cosmetic, chemical and plastic processing industries as well as for individual machines of these installations or for warehouse (management) systems and their components.

41 – Training of operating, maintenance and repair personnel for the machines, apparatus and devices

mentioned in classes 7, 9 and 11 and the installations consisting thereof; training of personnel, providing printed and electronic publications (downloadable), organization of conferences, organization of congresses, the aforementioned services for installations suitable for use in the beverage, food, pharmaceutical, cosmetic, chemical and plastic processing industries as well as for individual machines of these installations or for warehouse (management) systems and their components.

42 – Technological and scientific services and research work in the field of the production of containers, brewery installations, dairy installations, installations for making beverages, filling installations, packaging installations, sorting installations and warehouse management systems; research in the field of mechanical engineering for installations for producing containers, brewery installations, dairy installations, installations for making beverages, filling installations, packaging installations, sorting installations and warehouse management systems; technical project planning for installations for producing containers, brewery installations, dairy installations, installations for making beverages, filling installations, packaging installations, sorting installations as well as for individual machines of these installations and for warehouse management systems; engineering, in particular assessing and optimizing of machines and installations mentioned in classes 7, 9 and 11, with respect to efficiency, power consumption and environmental impact; engineering, in particular planning and constructing of turnkey logistics, brewery, filling and packaging installations; creating data processing programs for installations suitable for use in the beverage, food, pharmaceutical, cosmetic, chemical and plastic processing industries as well as for individual machines of these installations or for warehouse (management) systems and their components; technical consultancy with respect to computer software, data processing and logistics installations, computer hardware and software development, installation, correction, maintenance and updating of computer software, the aforementioned services for installations suitable for use in the beverage, food, pharmaceutical, cosmetic, chemical and plastic processing industries; industrial design of plastic containers and packagings for the beverage, food, pharmaceutical, cosmetic and chemical industries.
