- (54) NUT PICKING AND SEPARATING NUT  
CORE FROM SHELL DEVICE
- (57) Technical result of presumable invention:  
structural simplicity; picking of fallen ripe nuts,  
separating nut core from shell, storing them in a hopper,  
and placing the husks back onto the soil as a mulch.

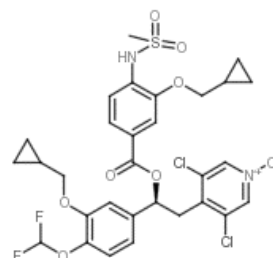

Essence of presumable invention is this that a device contains a frame having wheels, actuator, and flexible componentry. Executed as a lattice and inserted into a casing the drum is attached to the frame. Having flexible componentry the rollers, (brushed cylinders), are disposed rotatably in a chamber separating nut core from shell, parallel to drum circle wall, after whereof a fan is placed, and fan chambers and drum casing inner chambers are united. Drum chamber is connected to flexible corrugated picking tube, and fan casing is connected to husk and air outlet tube. Each rotatable component is connected to the actuator by means of belt transfer.

The field of use of presumable invention is agriculture, in particular, nut picking and separating nut core from shell device.

(54) TUNNEL CONSTRUCTION METHOD AND MACHINE

(57) A method for constructing natural tunnels comprises the steps: a) advancing an excavation front (EF) of a tunnel (1) by a predetermined advance length by means of point excavation with one or more self-propelled excavating machines (100); b) removing excavated material from a work region, located between the excavation front (EF) and a final lining front (FLF) of the tunnel (1), by means of one or more dump trucks (500); c) applying a primary lining (2) onto walls exposed by the excavation at the advance length of the excavation front (EF); d) advancing the final lining front (FLF) by a predetermined advance length by creating a final lining (4) on the primary lining (2) applied at the same advance length in a previous advance cycle; e) repeating steps a) to d) until the tunnel (1) is completed. The step d) of advancing the final lining front (FLF) comprises assembling at least one full ring (42') of prefabricated segments (41) and is carried out simultaneously with step a) of advancing the excavation front (EF). Furthermore, the step d) of advancing the final lining front (FLF) is carried out by means of a segment placing machine (200) having a tubular frame (201), and a passage or displacement of operating machines (100), vehicles, or equipment from/to said work region during said steps b) and c) takes place through the tubular frame (201) of the segment placing machine (200). A segment placing machine (200) for use in said method is also described.

CORE FROM SHELL DEVICE

(57) A device contains having stationary casing 5 and executed as a lattice the drum 4 rotatably attached to the frame 1. Having tapered shape separating nut core from shell the chamber 6 is formed between the drum and casing wall. The rollers 7 having flexible component is placed in to said chamber 6. Separating nut core from shell the chamber is equipped with a casing wherein a fan 8 is inserted; at that, the casings 9 of drum 4 and fan 8 are connected together. Receiving nut cores the hopper 11 is placed bellow the drum 4. Corrugated tube for collecting nuts is connected to said chamber, as well. An actuator is made as an engine and belt transfer by means whereof it is connected to the drum. In its turn, the drum is connected to the fan and flexible rollers by means of belt transfer.

1 – Chemical products for use in industry and science; Chemical substances, chemical materials and chemical preparations; catalysts; organosilicon compounds for use as catalysts in industry; catalysts for use in the control of hydrogen emissions; catalysts for use in the manufacture of industrial chemical products; catalysts for use in the control of hydrocarbon emissions; catalysts for use in the control of carbon dioxide emissions; chemical catalysts for use in syngas and the purification of olefins; chemical catalysts for use in methanol synthesis plant operation; desiccants in the form of crystalline molecular sieves for use as catalysts in the chemical industry; syngas catalysts for use in the manufacture and operation of ammonia plants; catalysts for use in non-biological processes; catalytic supports consisting of inorganic oxides; catalysts for use in chemical processes; manganese dioxide catalysts; catalytic supports; catalytic agents; homogeneous catalysts; synthetic catalysts; catalysts for oxidation processes; catalysts for chemical and biochemical processes; hydrogen; inorganic chemical products for use in industry; industrial chemical products for use in the manufacture of paints; chemical additives; chemical compositions for water treatment; chemical products for use in the electrical industry; electrolytes for batteries; ion exchangers [chemical preparations]; photosensitive organic coating compositions for application to substrates by means of electrolytic deposition; electrolyte solutions, other than for medical use; salts for galvanic cells; metal oxide powders for industrial purposes; chemical products for use in the manufacture of inks; chemical compositions for use in the manufacture of electrical components; ammonia; ammonia for industrial use; nanopowders for industrial use; filtering materials [chemical, mineral, vegetable and other unprocessed materials]; chemical preparations and materials for films, photography and printing; agricultural chemicals, except fungicides, weed killers, herbicides, insecticides and parasiticides; chemical products used for the manufacture of batteries and rechargeable batteries; compound semiconductor materials and substrates for use in industry.

2 – Paints; lacquers and varnishes; metallic inks; dyes, colorants, pigments; conductive inks; pigments for use in the preparation of inks; Metal printing inks; dry inks; metals in foil and powder form for use in painting, decoration, printing and art objects.

4 – Hydrogen [fuel]; electrical energy from renewable sources; fuels.

6 – Metals; processed metallic minerals; metals in foil or powder form for 3D printers; common metals and their alloys; goods of metal, semi-processed or unprocessed, without specified use.

9 – Apparatus, instruments and cables for conducting electricity; electrodes; electrodes for fuel cells; supercapacitors for energy storage; electric cells and batteries; power units [batteries]; power units [batteries]; uninterruptible power supply apparatus [batteries]; apparatus and instruments for accumulating and storage of electricity; ultracapacitors for energy storage; accumulators for photovoltaic energy; photovoltaic installations for producing electricity [photovoltaic power plants]; electrodes for laboratory research; galvanic cells; anodes; cathodes; electric and electronic components; monolithic ceramic capacitors; correction capacitors; capacitor-inductor filters; ceramic capacitors; apparatus and instruments for conducting, distributing, changing, transforming, accumulating, regulating or controlling electricity; solar cells; semi-conductors; integrated circuits.

35 – Office functions; the bringing together, for the benefit of third parties, of a variety of goods, excluding the transport thereof, enabling consumers to view and purchase those goods conveniently; company management; exhibitions and fairs for commercial purposes; commercial administration; advertising services; commercial business management services; commercial administration services; office functions; organization of exhibitions for commercial or advertising purposes.

40 – Processing of chemical products; treatment of materials using chemicals; electrolytic treatments; electrochemical surface treatments; generation of electrical energy from (chemical energy); manufacture (of electrodes for electrolyzers and batteries); generation of electrical energy from renewable energy sources; treatment of waste via electrolysis; treatment of semi-finished products by means of electrolysis; treatment of finished products by means of electrolysis; processing of iron oxides; purification treatment of water; fuel treatment services; processing of combustible materials; generation of electrical energy with carbon sequestration and storage; generation of electricity from wind energy; energy production; consulting in connection with electrical energy generation; gas and electricity generation; clean energy production; rental of equipment for treatment and transformation of materials, production of energy and custom manufacturing; electrochemical treatment.

41 – Education and training services; transfer of specialized knowledge; organization and conducting of conferences, congresses and symposiums; organization and conducting of training workshops; organization and conducting of seminars; organization and conducting of symposiums; publication of specialized scientific journals; postgraduate training courses; training courses in connection with research and development; provision of electronic publications (not downloadable); publication of scientific articles; publishing, editing of reports and writing of texts; organization and conducting of conferences; organization and

conducting of congresses.

42 – Scientific and technological services; research and development services; research and development services in chemistry; research in the field of hydrogen fuel cells; research in the field of energy; scientific research in the field of energy; technological consultancy services in the field of alternative energy generation; scientific and technological services in the field of electrochemical treatment, batteries, fuel cells, super capacitors, surface treatments, material processing, anti-corrosive treatments, conductive polymers and specialty polymers, energy storage, surface engineering and nanomaterials, as well as research and design relating thereto; industrial analysis and research services; design and development of computers and computer programs (software); scientific research in the field of renewable energy; design and development of renewable energy generation systems; scientific consultancy; environmental consultancy; technological consultancy; professional consultancy services relating to industrial design; engineering and design services and consultancy; consultancy relating to product development; research, development, design and updating of computer software; research and development of new products for third parties; research and development of new products for third parties in plastic materials; research in the field of nanotechnology; testing of materials; testing of materials; analysis of materials; feasibility studies relating to material analysis; technical consultancy relating to the use of materials for the preparation of electrical circuits; research in the field of materials science; consultancy with respect to electrolysis.
