(54) SYSTEM FOR EMBRYO TRANSFER

(57) The present invention relates to dispensing instruments and methods for introducing treatment material and fluid-like material with an embryo into a uterus. More specifically, the present invention relates to apparatuses for delivering a fertilized egg or embryo into a maternal uterine endometrium in humans or any other mammalian species and associated computer programs for controlling said apparatuses. A system includes a case executed to be placed in an uterus. The case has a cavity that extends from the proximal end of case to distal part thereof, and has a distal opening at distal part of case. The cavity is made so that the inner body can be placed therein capable of sliding. Distal end of inner corpus is intended to be penetrated into endometrial epithelium. Furthermore,

an apparatus additionally includes first executive component pulling inner case from distal hole thereof, and second executive component expelling fertilized egg from inner case, measuring node, and indicator device connected to measuring node.
