(54) HOOKAH DEVICE AND IMPROVED CONSUMABLE POD

(57) Described is a hookah device 100 with various hookah components that provide an improvement over traditional hookah devices. The hookah device (100) includes a heater head 102 with a pivotally mounted controller housing 106 that seals against a consumable pod 200 to form a pair of airflow seals therebetween. An inductively heated heat plate 600 is used, in conjunction with a pair of sensors 518, 1902, to precisely control the temperature of the heat plate 600 and consumable pod 200. A vase 1501 is secured against the heater head using a load dispersing mechanism. The load dispersing mechanism secures the vase while dispersing a clamping pressure to preventing breakage thereof. The load dispersing mechanism also provides hanger hooks 116 to secure a handle for directional control while carrying the hookah device.

- (54) MODIFIED CHESS EQUIPMENT
- (57) Playing equipment includes a surface consisting of plurality of square dark and light boxes of various types arranged alternately on a grid-shaped surface consisting of nine horizontal and vertical rows. The equipment contains a set of playing pieces consisting of two subsets: dark and light, each wherefrom is specific to each player/partner's next move. Said game box located at the intersection of fifth horizontal and fifth vertical row of aforementioned grid-shaped surface is designed in visually different way from other game boxes, and designed to allow different moves of game pieces so that when the partner plays thereon, he is removed from the game. At that, each subset of playing pieces additionally contains a pawn and a piece with a different visual shape from the rest intended to make turtle and knight moves.

(54) METHOD FOR PRODUCING MOTOR FUEL FROM ETHANOL

(57) A method is for producing motor fuel, and more particularly gasoline, kerosene, and diesel, from ethanol is disclosed. The ethanol is suitably obtained from a feedstock of mainly plant origin. In addition, intermediate products and by-products from the inventive motor fuel synthesis, e.g. alcohols, aldehydes, ketones, ethers, olefins, paraffins, and aromatic compounds can be obtained using the method.

1 – Chemical preparations for use in industry, namely, acids used in oil and gas exploration and production; hydraulic fluid; chemical preparations, namely, degreasing solvents used in oil and gas exploration and production; chemicals used in oil drilling; drilling muds for use in oil and gas well drilling; chemicals for welding; gases for welding; metal welding flux; chemical drilling fluids for use in subterranean wells, namely, drilling muds, completion fluids, workover fluids and wellbore fluids; chemical additives for use with drilling fluids; chemical drilling fluids for use in oil well drilling; hydrogen as an energy carrier; and lithium as part of a renewal energy system.

7 – Oil, gas, geothermal, water development, and carbon dioxide field equipment, namely, drilling rig mechanization machines and devices; structural and replacement parts for drilling rig mechanization machines, namely, locks, nipples, expandables, cones, isolation valves, liner hangers, couplings, bushings, manifolds, collars, cables, retainers, stabilizers, hold openers, mills, seals, plugs, drill bits, drill stems, tubes, tubing, swivels, half-mule shoes, guide shoes, burn shoes, washover shoes, drilling machine bearings, drilling machine rotors, packers, stators being parts of drilling rigs machines, safety valves, hangars, slicklines, pumps, tubing, pipes, pipe joints, safety joints, casings, and cables; drilling rig mechanization machines incorporating devices adapted for thereof, in particular, devices adapted for use with drilling rig mechanization machines, namely, flow control devices, gas flotation machine, toolstring centralizer, casing centralizer, liner centralizer, logging device centralizer, bow-spring centralizer monitoring devices, multi-lateral devices, packing devices, hold openers, under reamers, whip stocks, drilling motors, drilling machines, drilling hammers, drilling impact tools, milling assemblies, cutters, casing and tubing patches, injection pump, injection mandrel, injection line, injection swages, desanders, desilters, mud cleaner, shale shaker, vacuum degasser, decanter centrifuge, mud agitator, mud tank, centrifugal pump, mixing hopper, mud gas separator centrifuges, heat exchanger, compressor, batch reactor, continuous reactor, tubular furnace, boiler, pumps, dust collectors, wet scrubber, fabric filter, settling chamber, precipitator, oil treater, straddles, spears (mechanically operated device) for recovery of equipment lost downhole, vacuums, retrieving tools, fishing tools, drilling rigs, packers, rotating control devices, banding tool, hangars, reservoir screening machine, surface well screening machines, sensors, inflow control tools, slicklines, perforating devices, accelerators, scrapers, exchangers, gas lifting devices, fluid separators, flow meter [parts of machines], orifice meter [parts of machines], stability meter [parts of machines], capacitance meter [parts of machines], multiphase meter [parts of machines], holdup meter [parts of machines], viscosity-gel meter [parts of machines], borehole gravity meter [parts of machines], humidity meter [parts of machines], motors, accumulator, steerable motor, mud motor, generators, actuators, wellhead control panels, flowheads, machines for subsea boosting, booster pump, pump station, suction anchor, mud mat, hydraulic booster, vibration detectors, deadline anchors [machine] for tying down drill line and measuring load suspended from drilling rig; load anchors [machine] for supporting and reducing loads in wells; pump anchor [machine] for setting and resetting pumping depth of downhole pumps, machines for borehole imaging, machines for seismic imaging, electromagnetic pipe scanner, wells, storage devices, drilling tanks [parts of machines], production tanks [parts of machines], pressure storage tanks

[parts of machines], liquid tanks [parts of machines], mud tanks [parts of machines], settling tanks [parts of machines], measuring tanks [parts of machines], stock tanks [parts of machines], surge tanks [parts of machines], acid tanks [parts of machines], gauge tanks [parts of machines], machines for delivering hydraulic pressure and flow, hydraulic pumping units, hydraulic control system, hydraulic actuator, hydraulic booster, and apparatus for the remote observation and operation of oil and gas drilling rigs, pumps for use in irrigation system; parts of oilfield wellhead machines, namely, chokes, degassers, and centrifuges; power operated pressure control equipment consisting of parts of oilfield wellhead machines, namely, chokes, degassers, centrifugal degassers, hydrogen sulfide mud gas separators, dual mud gas separators for horizontal drilling; machine parts, namely, rubber and metal mechanical o-ring seals used in equipment for oil and gas exploration and production; cutting machines and machine tools, namely, powered machines for cutting or shaping or finishing metals or other materials; precision machine tools, namely, hard metal tools, high speed steel (HSS) tools, carbide tools, ceramic tools, poly crystalline diamond (PCD) tools, and diamond-coated and diamond-uncoated tools, and hard metal tools, all for use in the cutting and forming of material by others; mechanical seals; air-operated power tools, namely, drills, grinders, and millers; drills for the mining industry; electric power drills; pneumatic hand-held drills; power drills; power tools, namely, reamers; electric welding machines; laser welding machines; friction-stir welding tools, namely, welding torches; electric welding machines, namely, friction-stir welding machines; bits for mining machines; bits for power drills; core drilling bits; mining bits; tool bits for machines; bearings, as parts of machines; roller bearings for machines; pump diaphragms; machines, namely, cementing equipment in the nature of skid-mounted cementing units, batch mixers, liquid additive systems, mechanical cement slurry defoamer, subsea cementing head, casing packer, isolation packer, and solids fraction monitor used in oil and gas exploration and production; laser welding machines; electrodes for welding machines; electrical power generators using geothermal power; electrolysis machines for production of hydrogen gas; and machines for lithium mining; wireline tractors used in oil and gas exploration and production; tongs [parts of machines] used in oil and gas exploration and production for spinning pipes or to grip drilling components and apply torque; percussion hammers [parts of machine] used in oil and gas industry for percussion drilling; air coolers [parts of machines] for cooling systems used in oil and gas industry; evaporators [parts of machines] for use in oil and gas industry to remove particulates from liquids; shakers [parts of machine].

9 – Data processing equipment and computers; fire-extinguishing apparatus; downloadable and recorded

computer software to process data used for oil and gas exploration and production in locating, evaluating and producing hydrocarbons; downloadable computer firmware for digital enablement of oilfield tools; automated self-contained electronic surveillance devices that can be deployed to gather information in oil and gas exploration and production facilities; testing and measuring equipment used in oil and gas exploration and production facilities to test performance and efficiency of oil and gas well equipment; petroleum industry equipment, namely, electronic rig instrumentation for monitoring well pressure and volume of returned drilling fluid; micro-processor computer controlled rig-floor monitors with alarms for use in monitoring and displaying drilling equipment and the flow of gases or liquids; electronic pit volume totalizers and return flow sensors for use in blow-out prevention or monitoring of drilling fluid pressure, temperature, viscosity, and composition; electronic drilling recorders, namely, micro-processor controlled drilling mud electronic data logger for use in sensing and logging drilling fluid pressure, temperature, viscosity and composition; electric cables, fiber optic cables; cement testing machines; welding transformers; magnets for industrial purposes; magnets used in oil and gas exploration and production; hydrogen fuel cells; downloadable and recorded computer software for data processing and use in connection with exploring and developing geothermal resources, water management, and carbon dioxide storage and containment; and downloadable and recorded software for optimization of production of oil and gas wells in the fields of oil and gas exploration and production.

12 – Trucks equipped with apparatus to conduct services well testing, evaluating, drilling, completing, producing and repairing rendered in connection with oil and gas wells, and for acquiring, processing, interpreting, storing, presenting and transmitting from one location to another of well site logging data; boats and barges equipped with pumping equipment for fracturing, acidizing, cementing, and sand control in connection with oil and gas wells; land vehicles for cable inspection and on-site oil and gas well measurements; cementing equipment in the nature of cement trucks and cement trailers used in oil and gas exploration and production.

13 – Explosive substances and projectiles in the nature of shaped charges in the oil and gas industry for use in perforating metal casing lining and oil well along with the adjoining earth formation.

35 – Business managing the exploration, production and operations of gas and oil properties for others; advertising and marketing services, namely, promoting the goods and services of others in the fields of oil and gas exploration and production; online procurement for others, namely, purchasing of oil well drilling and well improvement services related to the fields of oil and gas exploration and production; ad-

visory services relating to data processing in the fields of oil and gas exploration and production; business consulting services for the energy industry related to establishing and improving business functions, namely, corporate and project strategies, organization management, operations management, operations improvement, technology management, mergers and acquisitions, and company integration.

37 – Construction project management services for others in the fields of oil and gas exploration and production; oil and gas drilling; consulting services in the fields of oil and gas well drilling; maintenance of wellbore area in oil and gas well drilling, namely, sand control services related to the fields of oil and gas well drilling; oil pumping, namely, artificial lift services in the fields of oil and gas well drilling; installation, maintenance, and repair of oil separators; rental of well drilling tools in connection with the fields of geothermal resources, water management, and carbon dioxide storage and containment; repair and maintenance of oil and gas drilling equipment and facilities; subterranean well drilling services; cementing services for oil and gas wells; drilling of wells; rental of drilling platforms; installation and maintenance of irrigation systems; installation and repair of irrigation devices; rental of irrigation and well drilling tools used in connection with irrigation services and oil and gas exploration and production; well improvement services, namely, enhanced oil recovery services for enhancing well production; recovery services, namely excavation to recover lost instruments and tools in well during oil and gas exploration and production; providing technical advice in the field of oil and gas drilling, namely technical advice on drilling fluids and drilling fluid use, and technical advice on data control, products control, and pressure control; and lithium mining extraction services; remedial services for oil and gas production, namely, refracturing, hydraulic fracturing of subsurface geologic formations, optimizing artificial lift operations, matrix stimulating operations, acid stimulation services, and post perforating treatments to remove debris from existing perforations, all for enhancing well production; rental of wireline tractors used in oil and gas exploration and production.

39 – Waste oil collection for recycling; transportation and physical storage of captured carbon dioxide for others; distribution of electricity from geothermal power; and storage and distribution of hydrogen gas; transportation logistics services, namely, planning and scheduling the transport of drilling rigs and vessels used in oil and gas exploration and production.

40 – Perforating services in connection with the oil and gas industries; rental of production facilities and plants for others to allow production of oil and gas while full field development is being planned and permanent facilities are being built; generating electricity from geothermal energy; carbon capture for others

using direct capture technology, absorption, adsorption, chemical looping, membrane gas separation, and gas hydration; and gas production services, namely hydrogen production.

41 – Educational services, namely, conducting classes, seminars, conferences, and workshops in the fields of oil and gas exploration, measurement, detection, and production, geothermal resources, water management, storage and containment of carbon dioxide, and environmental issues and distribution of course material in connection therewith.

42 – Providing information, news and commentary in the fields of oil and gas exploration; technical support services, namely, troubleshooting of computer software problems used in the fields of oil and gas exploration and production; updating of computer software for others; providing technical information updates of computer software used in the fields of oil and gas exploration and production; computer software consultation; consultation services in the fields of selection, testing, implementation and use of computer hardware and software systems for others; providing online information in the fields of computer software used in the fields of oil and gas exploration and production; testing, analysis, and evaluation of hydrocarbon properties of oil and gas reserves; providing measurements and downhole telemetry while drilling; engineering services in the field of environmental compliance; conducting environmental wellbore survey services in the field of oil and gas exploration and production, geothermal resources, water management, and storage and containment of carbon dioxide industries; oil and gas well logging and testing services; inspection services, namely, inspection of oil and gas well fields and detection of leaks in oil and gas well structures and operations thereof; sampling services, namely sampling of oil and gas for quality analysis purposes; performing oil and gas well diagnostics; oil and gas well surveying; surveying of oil-bearing seams; non-medical ultrasound imaging services in connection with oil and gas exploration; conducting magnetic resonance imaging interpretation and analysis for the oil and gas industries; computer modeling services, namely, computer simulation of drilling processes and operation of facilities used in oil and gas exploration and production; engineering, modeling, and designing of wells and drilling parameters, namely, models or plans for constructing and operating facilities for oil and gas wells in connection with drilling; software as a service (SAAS) services featuring software for use in optimization of oil and gas exploration and production solutions, including cloud based solutions, software-as-a-service solutions, machine learning, artificial intelligence, and on-premise solutions; design of seismic acquisition parameters, namely, models or plans for acquiring seismic data used in connection with oil and gas drilling operations; rental of extended well testing facilities for others to allow

production of oil and gas while full field development is being planned and permanent facilities are being built; subterranean oil well testing services for use in connection with subterranean oil well drilling operations; engineering services in connection with the selection and use of specialized equipment for subterranean well drilling operations; oil well testing, namely providing oil well pressure control testing services for others in the oil and gas industries; oil and gas exploration; engineering services in connection with exploring and developing geothermal resources, water management, and carbon dioxide storage and containment; consulting services in the field of research and development in the field of geothermal energy, namely geothermal resources, water management, and carbon dioxide storage and containment; rental of computer software for data processing and use in connection with exploring and developing geothermal resources, water management, and carbon dioxide storage and containment; engineering services in the field of carbon capture and storage; research and development in the field of carbon capture and storage; engineering services in the field of lithium extraction; research and development in the field of lithium extraction; engineering services in the field of geothermal power production and distribution; research and development in the field of geothermal power production and distribution; engineering services in the field of hydrogen production, storage and distribution; research and development in the field of hydrogen production, storage and distribution; and software as a service (SAAS) services featuring computer software to process data used for oil and gas exploration and production in locating, evaluating and producing hydrocarbons.
